PROFESSIONAL SUMMARY

Backend Developer with 3+ years of experience building scalable systems using .NET, C#, SQL, and cloud technologies. Skilled in secure API development, backend optimization, and client-focused delivery. Dedicated to clean code, robust architecture, and continuous professional growth.

SKILLS

Languages: C#, SQL, Node.js, HTML, CSS

Frameworks: .NET Core, ASP.NET MVC

Databases: MySQL, MSSQL, NoSQL

DevOps & Tools: Docker, Git, Azure DevOps, AWS

Concepts: RESTful APIs, Microservices, Authentication, CI/CD

EXPERIENCE

Freelance Software Developer

Remote | Feb 2022 – Present

- Developed backend microservices using .NET Core and MSSQL; exposed via REST APIs.
- Built an Employee Self-Service portal using MVC for HR tasks and profile management.
- Delivered maintainable, client-tailored solutions following SDLC principles.

Backend Developer – InternPulse

June 2024 – March 2025

- Developed backend systems for financial platforms using .NET Core, MySQL, and JWT.
- Integrated Paystack for payment processing with refunds and verification endpoints.
- Enhanced API performance and ensured secure, scalable backend systems.

IT Intern – Forestry Research Institute of Nigeria

Feb 2023 – Jan 2024

- Contributed to biomedical research projects including regenerative medicine and cancer.
- Supported data-driven research and managed documentation for genetic analysis systems.

EDUCATION

B.Sc. Plant Science

Olabisi Onabanjo University, Ogun State — 2020 – 2024

O-Level, Science

Anwarul Islam College, Oyo State — 2013 – 2019

CERTIFICATIONS & ACHIEVEMENTS

Software Development MasterClass – July 2022

Successfully designed and delivered bespoke software solutions for diverse clients. Focused on backend development, API creation, and database integration, while consistently applying best practices and maintaining clean, efficient code standards.

InternPulse Finalist (Cohort 6) – March 2025

Recognized among the top 1% of participants for outstanding performance in backend development. Developed and maintained scalable backend systems and APIs, implemented optimized database architectures, and ensured robust service performance.

Ladder Tech Mentorship Program (Cohort 4) – May 2025

Completed an intensive mentorship program emphasizing professional growth through one-on-one mentoring, expert-led technical sessions, and active participation in software development knowledge-sharing initiatives.

AWS Educate – Machine Learning Foundations – June 2025

Acquired a strong foundation in machine learning concepts, including supervised and unsupervised learning, model evaluation, and cloud-based implementation. Gained hands-on experience applying ML principles using AWS infrastructure and tools.
